PROFILE

Full stack developer with over 10 years of experience designing and building digital products. I work end to end: from user experience to software architecture, through development, integrations and process automation.

I combine technology, design and product thinking to help companies, brands and startups turn concrete problems into digital solutions that are simple, scalable and measurable.

WHAT I CAN BUILD

Web & software	Web applications, internal tools, custom platforms and integrated systems.
Mobile apps	iOS and Android from a single codebase, through to store release.
E-commerce	Shopify, WooCommerce, custom features, conversion and integrations.
WhatsApp API	WhatsApp Business API integrated with e-commerce, internal tools and custom sites: notifications, support and automated flows.
AI & automation	AI and OCR automation, document processing, APIs and intelligent workflows.
UX/UI	Experience architecture, wireframes, interfaces and design systems.

TECHNICAL SKILLS

Development	TypeScript · JavaScript · Python · PHP · React · Next.js · Remix · Node.js · Express · Tailwind
Mobile	Flutter · iOS · Android · RevenueCat
E-commerce & CMS	Shopify · WooCommerce · WordPress · Sanity · Stripe
AI & automation	OpenAI · Claude · Hugging Face · n8n · Zapier · OCR · REST APIs · WhatsApp Business API
Data	PostgreSQL · MySQL/MariaDB · MongoDB · Firebase
Infrastructure	Docker · Nginx · Linux · Cloudflare · Vercel · Git/GitHub
Design & analytics	Figma · GA4 · Meta

EXPERIENCE

Senior Full Stack Developer & UX/UI Designer

Freelance · 2023 – present

Design and development of digital products for companies, agencies and brands: web applications, e-commerce, AI automation, UX/UI, API integrations and technical consulting.

Full Stack Developer

ISO Produzioni S.r.l. · 2018 – 2023

Web product development and direct project ownership with clients, including enterprise accounts. High-traffic site migrations, third-party API integrations and custom administrative tools.

Junior Web Developer

MadeOnline S.r.l. · 2017 – 2018

Websites and CRMs built with PHP, HTML, CSS and JavaScript.

AREAS OF WORK

The broad sectors I have worked in so far; each one covers more specific niches. The list does not limit the areas I can work in.

Real estate	Websites, internal tools, back-office systems and marketing automation: fewer manual steps for agencies and networks.
Fashion	Digital projects, app development and online presence for brands in the sector.
Cosmetics	E-commerce and AI-generated photorealistic imagery for websites and paid campaigns: product visuals without the time and cost of a shoot.
Education & training	Platforms, websites, internal tools and automation for training organisations.
Academic & healthcare	End-to-end projects with Italian universities and an app for healthcare staff and patients: two very different audiences inside one interface.
Online publishing	A magazine built from scratch, from design to site, with the editorial and SEO strategy behind it: entirely organic traffic, no ad budget.
Corporate groups	Websites for insurance groups, high-traffic portal migrations, API integrations and custom CRMs connected to invoicing.
Non-profit foundations	Websites and digital tools for foundations and third-sector organisations.
Air travel & accessibility	Internal systems for staff assisting passengers with disabilities, plus a SaaS service with location tracking and video calls: operational software, used every day.

LANGUAGES

Italian	Native
English	Strong listening comprehension · Good spoken command

EDUCATION

Technical secondary school	Diploma in computer science. Everything after that was learned on the job: over 10 years of projects in production.
-----------------------------------	---

LET'S WORK TOGETHER

I am available for projects and collaborations: building a product from scratch, growing something that already exists, or solving a specific technical problem. I can own the strategy, engineering and design end to end, or work alongside a team already in place. For case studies, visit www.mirkobuttazzo.com.
